

# Job offer

## Flex developer/ System architect (m/w)

We offer a position as Flex Developer / System architect to grow our Romanian development team. The position is a full-time freelance position with continuous project contracts.

Your task is to develop software applications based on basic functional descriptions and work with your Romanian based team lead to deliver projects on time and in excellent quality to customers. With us you have the possibility to get to know the most interesting international projects, modern programming methods and a lot of exciting challenges. We offer a very competitive salary and possibility to work from your home-office.

### Qualifications we are looking for

- You are highly motivated, results driven and quality focused
- At least 4 years experience in software development (min. 2 years Flex experience)
- Very good programming skills in Action script, MXML and PHP using Flash builder
- Good knowledge of HTML, JavaScript and SQL
- Experience with XML-based web-services
- Experience in working in a Linux Server environment with MySQL Server
- Fluent English language skills
- Preferred location: Romania, home office
